

FY 96 - 2000

TRANSPORTATION IMPROVEMENT PROGRAM

METROPOLITAN PLANNING ORGANIZATION

OF

PALM BEACH COUNTY

MAY, 1995

Adopted May 18, 1995

---

Chair

## TRANSPORTATION IMPROVEMENT PROGRAM

The Transportation Improvement Program is a staged program encompassing a five-year period consisting of improvements to all modes of travel in Palm Beach County. The TIP is developed through a continuing, comprehensive and coordinated effort involving the Florida Department of Transportation, the Board of County Commissioners, the Port of Palm Beach and municipalities with the County.

The TIP contains projects funded by Federal, state and local sources located primarily on the State Highway System. This Program reflects the initial impacts of the new Intermodal Surface Transportation Efficiency Act of 1991 (ISTEA). The TIP is based on and reflects the Florida Department of Transportation's FY 95-99 Five-Year Work Program for Palm Beach County, and generally moves forward the projects in the FY 99-2000 time frame. Since projects are subject to limited change due to unforeseen problems, the DOT program and the TIP may be modified throughout the year.

To provide for continuity and ease of use, the projects contained in the TIP have been aggregated by type and listed in sections. The TIP is divided into the following sections:

- Major Improvements - State: significant capacity additions
- Interstate 95 (I-95) - State: improvements to I-95
- Florida Turnpike: Turnpike-related activities
- Transportation System Management - State: low-cost improvements
- Maintenance - State: maintenance
- System Preservation: roadway reconstruction
- Airports - State: airport improvements
- TriRail: commuter rail projects
- Port of Palm Beach: port improvements
- Transit - Cotran: mass transit projects
- Transportation Disadvantaged: transportation disadvantaged and ADA projects
- Enhancements: transportation enhancement projects

The MPO in cooperation with State, County and local government agencies participates in a countywide level of service analysis monitoring program. Twice a year, traffic counts are used to identify and map over capacity links based on LOS "D" standard. This analysis serves as Tier 1 in the two tier Congestion Management System performance standards and it guides the prioritization of projects within the TIP.

In order to be included in the TIP, a major improvement project must be in the MPO adopted long-range plan. The intent of the TIP is not only to address current problems but to construct the needed facilities for the long-range plan. The current long-range transportation plan is the Year 2010 Interim Transportation System Plan. This Plan was developed by consultants for the Urban Study Area and is maintained by MPO staff. The Plan contains both a highway element and a transit element. Modifications to the Plan have been made to reflect changes in anticipated development levels and proposals for specific roadway links. These modifications are reviewed and approved by the MPO. The 2010 Plan is contained in the County Comprehensive Plan and in local municipal comprehensive plans. This inclusion ensures consistency with local comprehensive plans to the maximum extent feasible. Projects included in the Transportation System Management element are selected to provide a short-term solution and be accomplished in a minimal amount of time with low capital investment. Transit projects are taken from the Transit Development Plan prepared and adopted by the MPO. Port of Palm Beach projects are taken from the port master plan to ensure consistency to the maximum extent feasible. The TIP also includes explanations of codes and abbreviations. As a result of ISTEA, the MPO area now includes the western Glades portion of the County. Since this inclusion is recent, the long-range plan does not include the western area. The TIP contains projects programmed by FDOT for this area.

The Transit section of the TIP contains project funding for transportation disadvantaged activities required by Chapter 427, F.S. The MPO serves as both the planning agency and the Community Transportation Coordinator. In these roles, the MPO assesses the needs of the county, prepares a service plan and coordinates the provision of services in accordance with the plan. Funding for the disadvantaged activities is included in the Transportation Disadvantaged section of the adopted TIP. The TD projects included in this document mark a significant increase over the projects in previous TIPs.

The requirements of the Clean Air Act Amendments of 1990 and the projects contained in the TIP were evaluated. A Conformity Determination Report using the Interim Guidance approved by USDOT and EPA was prepared to determine if the projects in the TIP would maintain or reduce emission levels. The results of the study indicated the roadway improvements contained in the TIP would decrease the emissions and meet the requirements of the Interim Guidance. A Conformity Determination Report was prepared and is available in a separate document.

The TIP was reviewed by the Technical Advisory Committee (TAC) and the Citizens Advisory Committee (CAC). The TAC is composed of planning and engineering staff from municipal, county and state agencies and organizations to provide input on the technical aspects of the program. The CAC is composed of representatives from the community with interests in transportation and planning to provide a citizen viewpoint on transportation projects and impacts. The TIP was also distributed at centralized locations in the county for review and comment to the MPO.

## TABLE OF CONTENTS

Glossary	i
Funding	ii
Environmental Codes	iii
Major Improvements - State	1
Interstate-95 (I-95) - State	4
Florida Turnpike - State	6
Transportation System Management - State	8

## GLOSSARY

<u>CODE</u>	<u>NAME</u>
CEI	Construction Engineering Inspection
CST	Construction Scheduled
FAA	Federal Aviation Administration
FDOT	Florida Department of Transportation
MSC	Miscellaneous Construction Scheduled
PBC	Palm Beach County
PBCDOA	Palm Beach County Department of Airports
PBCTA	Palm Beach County Transportation Authority
PE	Preliminary Engineering Scheduled
PLN	Planning Scheduled
PPB	Port of Palm Beach
RB	City of Riviera Beach
ROW	Right of Way Acquisition Scheduled
UTIL	Utilities
TD	Transportation Disadvantaged

# FUND CODES

AC This prefix denotes "Advance Construction Funds" and can be placed before a number of Federal aid fund categories. AC projects are done as state-funded projects and later converted to a regular Federal Aid category when funds are available.

BA	Donor Bonus - any area (federal)	NH	National Highways (federal) (principle arterial)
BNCA	Bonds - controlled access roads (state)	NHS	National Highway Safety (federal)
BNDS	Bonds State roads (state)	NHTS	National Highway Traffic Safety (fed)
BRP	State Bridge Replacement	PKCA	Turnpike - controlled access
BRRP	State Bridge Replacement-on federal system	PKYR	Turnpike Rehabilitation
BRTZ	Federal Bridge Replacement-off federal system	PKYI	Turnpike Improvement
BU	Donor Bonus-Urban areas 200K pop. and up (fed)	PORT	Seaport Trust Fund
CM	Congestion Mitigation	SA	Surface Transp. Program-any area (fed)
D	Unrestricted state primary funds	SE	Surface Transp. Program-enhancement (fed)
DDR	District Dedicated Revenue (state)	SH	Surface Transp. Program-hazard elimination (federal)
DI	Statewide Inter/Intrastate Highway	SN	Surface Transp. Program-mandatory non-urban (federal)
DIH	State in-house product support	SP	Surface Transp. Program-RR protective devices (fed)
DIM	State-intermodal development	SR	Surface Transp. Program-RR hazard elimination (fed)
DS	State primary highways and public transit	SS	Surface Transp. Program-Safety (federal)
DSL	Local Gov't Cooperative Assistance program	SU	Surface Transp. Program-urban areas 200K and up (fed)
DU	State primary funds/federal reimbursement	TDD	Transportation Disadvantaged-Discretionary
FAA	Federal Aviation Administration	TDTF	Transportation Disadvantaged Trust Fund
FCO	State-fixed capital outlay	XA	Surface Transp. Program-consolidates BA, MA and SA Funds
FRA	Federal Railroad Administration	XL	Surface Transp. Program-consolidates BL, ML and SL Funds
FSTED	- See Port	XU	Surface Transp. Program-consolidates BU, MU and SU Funds
FTA	Federal Transit Administration	XBR	Rollup (IM + MAIM)
HPR	Highway Planning Research (federal)	XCM	Rollup (CM + MACM)
I	Interstate (federal)	XIM	Rollup (IM + MAIM)
IM	Interstate Maintenance	XNH	Rollup (NH + MANH)
LF	Local Funds		
LFF	Local Funds - matching FA		
LFR	Local Funds - reimbursement from FDOT		
MA	Minimum allocation-any area (federal)		
MAXX	(XX=Fund)		
MABP	Minimum allocation-bridges (non-BRT)		
MU	Minimum allocation-urban areas 200k pop. and up (fed)		

## ENVIRONMENT SURVEILLANCE IDENTIFICATION

As part of the coordination efforts between the Department of Transportation and the Department of Environmental Regulation, a procedure has been established to identify all projects that may have environmental impacts. The responsible agency will review the project being submitted for inclusion in the TIP and use appropriate codes to identify its potential environmental impacts. These codes will serve as indicators to DER and other agencies so that problems may be solved earlier in the process and not cause delays. The codes are identified below.

### ENVIRONMENTAL ABBREVIATION CODES

- A Air Quality
- B Barrier Island
- C Critical Habitats
- E Evaluated
- F Floodplains and Flood Prone Areas
- G Groundwaters
- H Hazardous Waste Sites
- L Lands and Waters Having Special State or Federal Designations
- N Stormwater Runoff
- O Historical or Archaeological Sites
- R Recreational Areas
- S Surface Waters
- T Threatened or Endangered Species
- W Wetlands
